Applications

A key inflammatory mediator - Interleukin 6 (IL-6)

- A multifunctional cytokine
- Produced by lymphoid and nonlymphoid cells in response to tissue damage and infections
- Trigger the acute phase response on various target cells^[1]

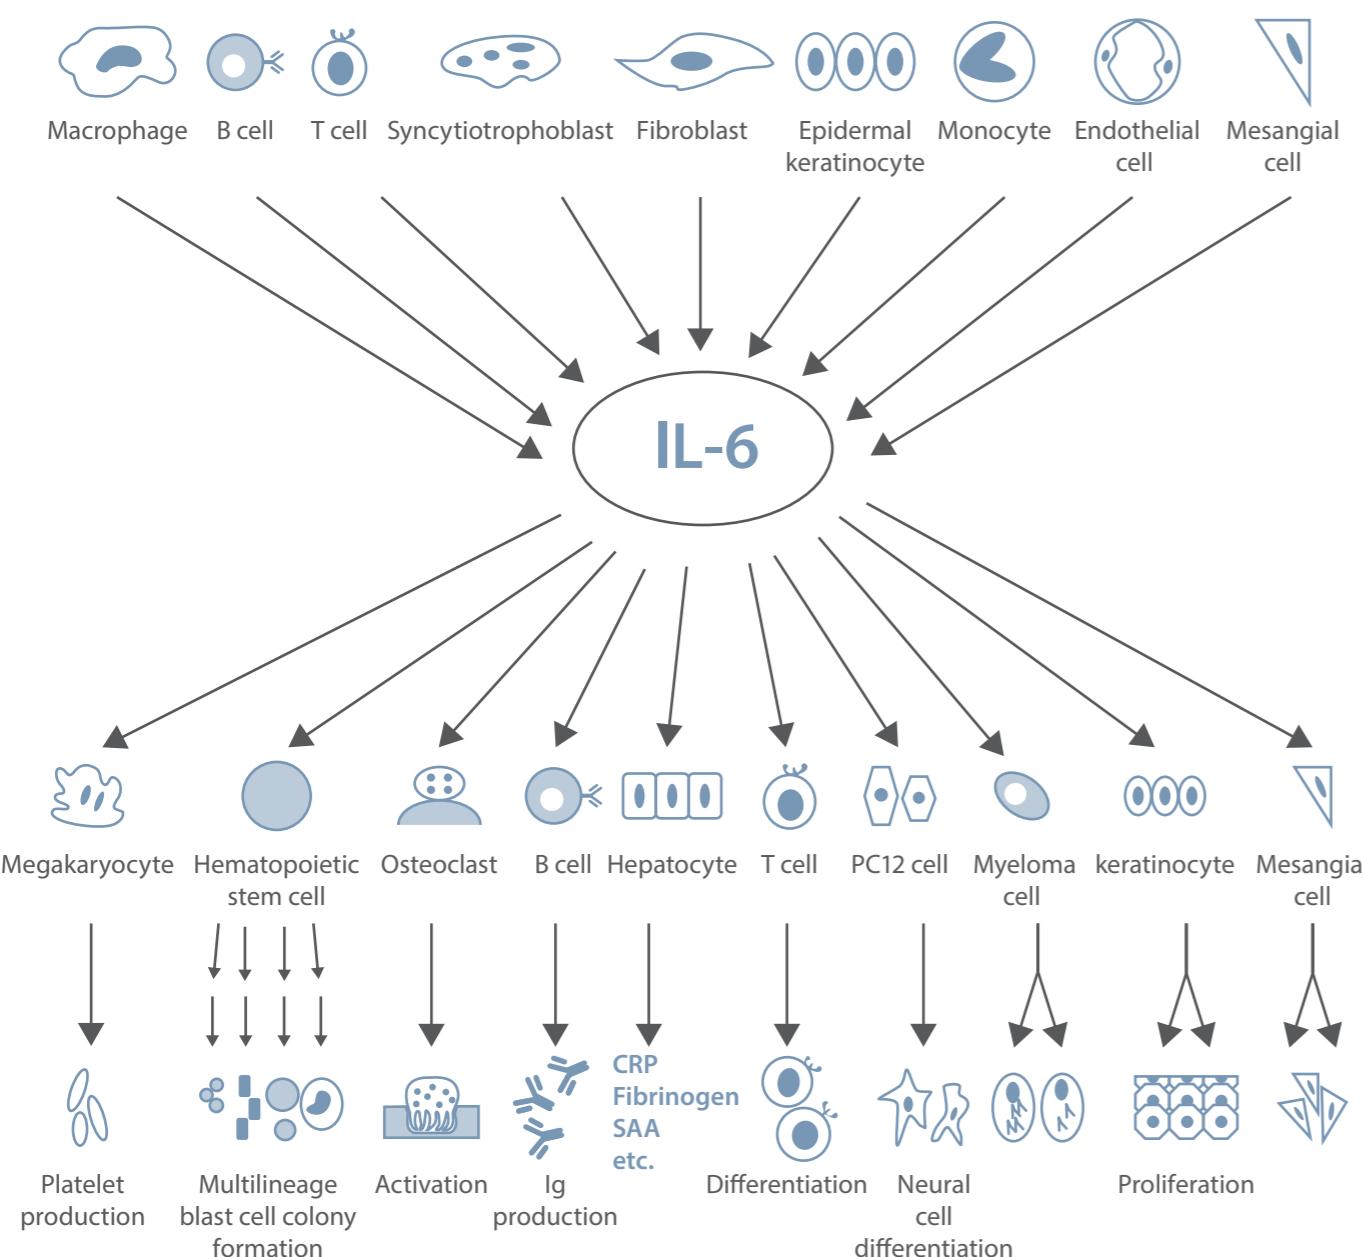

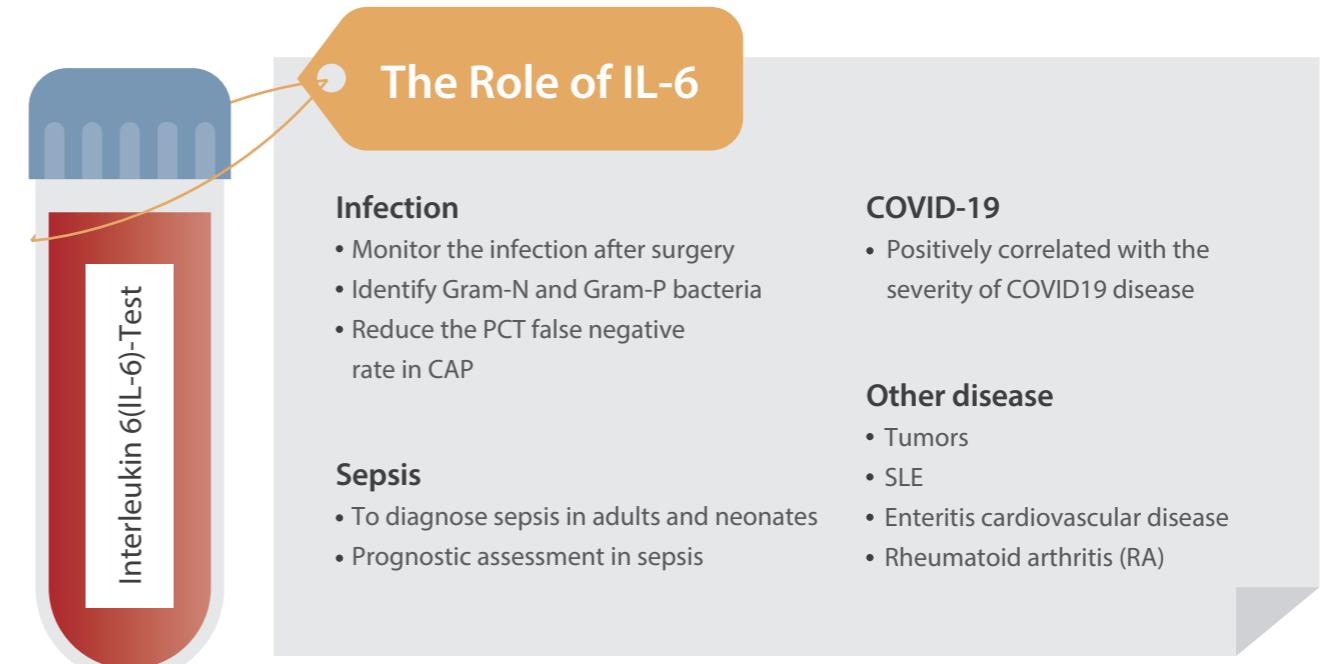

Fig. Biological activities of IL-6^[2]

Clinical significance of IL-6

Diagnosis of bacterial infection

IL-6 levels in the bacterial infection group were significantly higher than those in the non-bacterial infection and healthy groups.

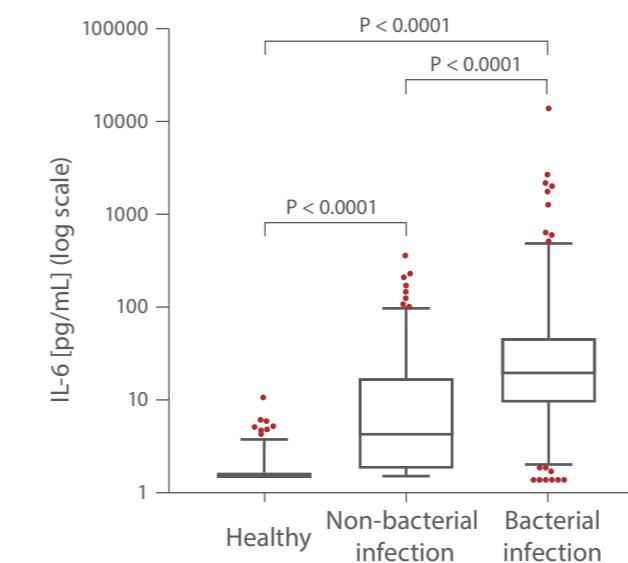

Fig. Distribution of IL-6 in healthy individuals (n=118), patients with non-bacterial infection disease (n=163) and patients with bacterial infection disease (n=188)

Assessment of sepsis severity

IL-6 concentration distribution showed a statistically significant difference between sepsis and septic shock.

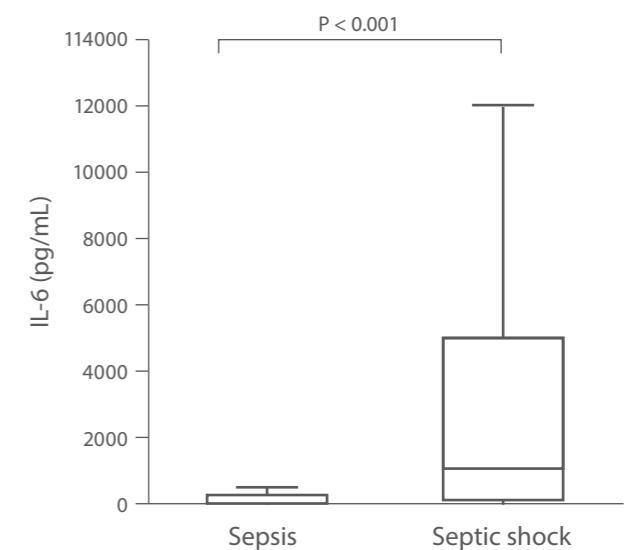

Fig. IL-6 levels in patients with different pathological conditions: sepsis (n=71) and septic shock (n=49).
