Importing / Exporting Configurations

## Mindray ePM Patient Monitor

How to download ePM Standard configurations from the Mindray UK Website:

- Visit www.mindrayuk.com/education
- Find the ePM Standard Configuration zip file and download onto PC. Please note an encrypted USB stick cannot be used
- Unzip the file and copy the **mrbigdipercfg** folder and the **mrbigdiperUser** folder to a USB stick

To import the configuration from the USB drive to the monitor, follow this procedure:

- Connect the USB drive to the monitor's USB port
- Select the **Main Menu** quick key → swipe to the **Configuration** column → select **Manage**

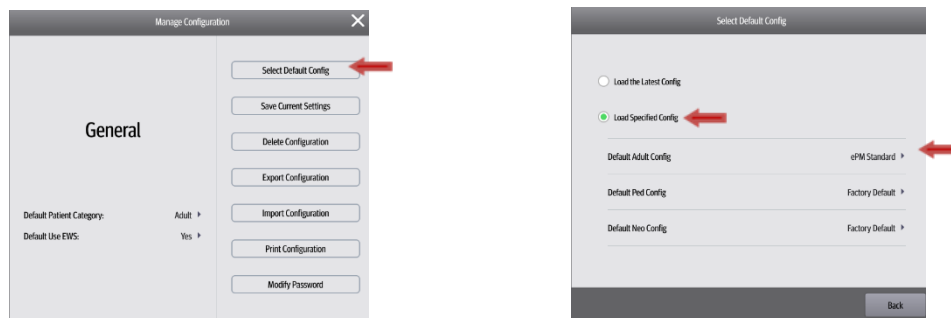

- Input the password 315666 and select
- Ensure the **Default Patient Category** is selected and whether **Default Use EWS** is **Yes** or **No**
- Select **Import Configuration** → select the **Configurations** and **User Maintenance Settings** to import → select **Import** → select **Back**
-

**To set the default configuration, follow this procedure:**

- In the **Manage Configuration** menu choose **Select Default Config** → select **Load Specified Config**

- Press the area labelled **Defaults** located next to **Default Adult Config / Default Ped Config / Default Neo Config** → select appropriate configuration → select **Back** → select **X** to exit the menus

To export the configuration to the USB drive from the monitor, follow this procedure:

- Connect the USB drive to the monitor's USB port
- Select the **Main Menu** quick key → swipe to the **Configuration** column → select **Manage**

- Input the password 315666 and select ⏎
- Select **Export Configuration** → select the **Configurations** and **User Maintenance Settings** to Export → select **Export** → select **Back**
