Importing Configurations
Mindray BeneVision N Series Patient Monitor

How to download N15 Standard configurations from the Mindray UK website:
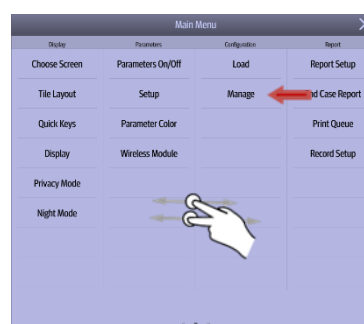

- Visit www.mindrayuk.com/education
- Find the N15 Standard Configuration zip file and download onto a PC. Please note an encrypted USB stick cannot be used
- Unzip the file and copy the **mrbigdipercfg** folder and the **mrbigdiperUser** folder to a USB stick

To import the configuration from the USB drive to the monitor, follow this procedure:

- Turn the N Series patient monitor on with power key
- Connect the USB drive to the monitor's USB port on the back of the monitor
- Select the **Main Menu** quick key

- Swipe to the **Configuration** column → select **Manage**

- Input the password 315666 and select ⏎

- Ensure the **Default Patient Category** is selected and whether **Default Use EWS** is **Yes** or **No**

- Select **Import Configuration** → select **User Maintenance Settings, N15 Standard (Adult), N15 Standard (Ped)** and **N15 Standard (Neo)** → select **Import** → select **Back**

To set the default configuration, follow this procedure:

- In the **Manage Configuration** menu choose **Select Default Config** → select **Load Specified Config**
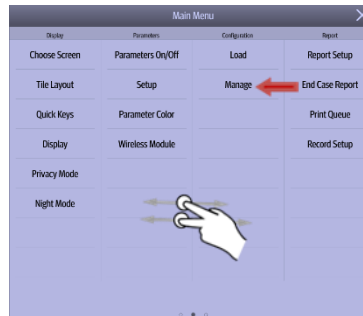

- Press the area labelled **Factory Default** located next to **Default Adult Config / Default Ped Config / Default Neo Config** → select **N15 Standard** for each of the three patient categories (Adult, Ped and Neo) → select **Back**→ Press '**X**' to exit menu

To export the configuration to the USB drive from the monitor, follow this procedure:

- Connect the USB drive to the monitor's USB port
- Select the **Main Menu** quick key→ swipe to the **Configuration** column→ Select **Manage**

- Input the password 315666 and select ⏎
- Select **Export Configuration** → select the **Configurations** and **User Maintenance Settings**→ select **Export** → select **Back**

In order to transfer configurations to an N1 via a USB stick, a dock is required. For further information, please contact the Clinical Application team.
