CO₂ Module
Measure & Standby modes
Quick Guide

Mindray

(1) CO₂ menu hard key
(2) CO₂ Measure/standby hard key
(3) CO₂ watertrap seat
(4) Gas outlet
(5) Sample line connector
(6) CO₂ sensor connector
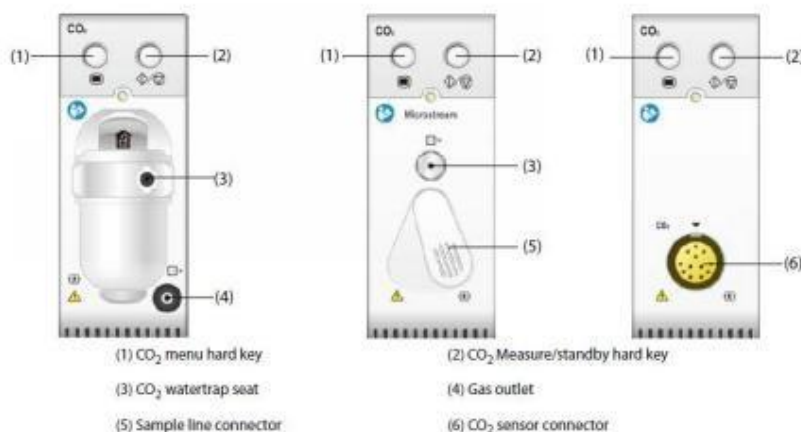

To enter or exit the Standby mode manually

- Select the ◇/▽ hard key on the CO₂ module to enter or exit **Measure** / **Standby** mode

- Select **Operating Mode** in the **CO₂ Setup** menu and toggle between **Measure** and **Standby**

Information displayed when the CO₂ Module is in Standby mode

When the CO₂ Module is placed into standby mode, the sample intake pump sets to a sample flow rate of zero and the word **Standby** appears on the monitor display

When exiting **Standby** mode by pressing ◇/▽ the CO₂ intake pump defaults to the preset flow rate

Please Note: The system configuration may be set to automatically place the CO₂ Module into standby mode following a predetermined period of inactivity
