Dear Esteemed Pathologists and Post graduate students

Greetings from IAPM Kerala Chapter !!

The field of pathology is constantly evolving, and the tissue diagnosis of lung, pleura and mediastinal lesions are no exception. With the recent release of the new WHO classification, it is crucial for pathologists to stay updated on the latest advancements and challenges in this domain as this is one of the commonest biopsies we encounter on day to day basis. This webinar aims to address these critical aspects, enabling you to navigate the complexities of biopsy diagnosis effectively.

We, IAPM KERALA CHAPTER are excited to invite you to an informative and engaging webinar on the Challenges in the pathology of Lung, Pleura and Mediastinum, held in view of the upcoming 91st chapter meeting due on 12th August 2023. This is the 5th time such webinars are being held with a view to benefit both Practicing Pathologists and Post graduates. This virtual event will take place on 26th and 27th of August, providing an excellent opportunity for pathologists to enhance their understanding and knowledge in this specialized area of pathology.

We are honored to have a distinguished panel of renowned experts, who will be sharing their invaluable insights and experiences. Their expertise will undoubtedly enrich your knowledge and equip you with the necessary tools to overcome the new challenges encountered in surgical Pathology. The webinar is open to pathologists, pathology residents, and any healthcare professionals involved in the diagnosis and management.

We sincerely hope that you will accept our invitation and join us for this enlightening webinar.
