

Working together to reduce your anesthesia energy consumption

Mindray and AGR have partnered to help reduce the energy consumption of your anesthesia systems.

The DGSS¹ is now available as an accessory component to the A-Series Anesthesia Systems. This novel device shuts off the evacuation system when your anesthesia workstation is not actively exhausting waste gas, reducing energy consumption by up to 90%.

Contact your local Mindray representative to learn more about how you can reduce your anesthesia related energy consumption and operating costs.

To learn more about the Dynamic Gas Scavenging System please visit www.gasrecycler.com.¹

The DGSS is manufactured by Anesthetic Gas Reclamation.
