Get Connected with VS 9 eVitals Charting Solution for MedSurg

As the Medical Surgical (MedSurg) floor continues to face an increase in patient acuity levels, bed shortages and high patient-to-nurse ratios exacerbate the everyday challenges associated with this already stressful environment. The growing demands placed on clinicians make it even more difficult to balance the multitude of responsibilities that come with caring for patients. With more patients being admitted to the MedSurg floor, the need for accurate and up-to-date information in the electronic medical record (EMR) is even more critical to help with time management and efficiency.

See how Mindray's VS 9 eVitals Charting Solution can help alleviate some of the challenges clinicians face in MedSurg.

Improve Clinical Workflow

Simplify how you capture and send vital signs data to the EMR at the point of care. In less than one minute, measure patient vital signs and simply send this data to the EMR.

The VS 9 eVitals Charting Solution allows clinicians to:

- Increase productivity and efficiency to help minimize the stress associated with staffing shortages
- Save time by eliminating the possibility of transcription and omission errors
- Enhance the patient experience by spending more time addressing your patients' needs and less time interacting with the monitor

VS 9 Scan. Capture. Complete.

Customize Your Connectivity

Having the flexibility to customize your workflow and connectivity to suit your MedSurg floor's specific needs is critical. Mindray understands this and will partner with you to evaluate your hospital's infrastructure, determine how the VS 9 can integrate seamlessly into your workflow, and automate your vital signs monitoring solution. Our process is unique to you since no MedSurg floor is the same – let us understand how you are currently charting and what changes would be the most impactful, so we can recommend the best connected vitals solution to streamline your day-to-day.

Experience a true eVitals Charting Solution with the VS 9 Vital Signs Monitor.
