

Vascular in Motion

Exceptional Performance for Mobile Vascular Imaging

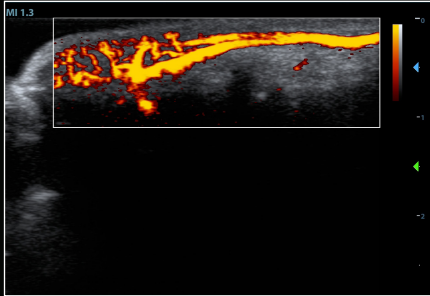

Ultrasound is the modality of choice for vascular imaging due to its numerous advantages including cost-effectiveness, real-time results without sedation or anesthesia, and high-quality imaging without ionizing radiation exposure. From routine preventative screenings to vascular surgical interventions, ultrasound provides diagnostic answers in real-time. With exceptional Color Doppler and Pulsed Wave (PW) Doppler performance in a lightweight, portable laptop design, the M9 Premium enables clinicians to bring enhanced vascular assessment to the patient for rapid diagnostic results.

With over 30 years of experience, Mindray has consistently brought innovative ultrasound solutions to the market. Mindray's unique mQuadro+ system architecture combined with single crystal 3T™ transducer technology provides market-leading performance and cutting-edge software features to ensure that clinicians have the tools they need to provide excellent patient care and elevate outcomes. Imaging comprised of fast frame rates, decreased motion artifacts, and precise display of hemodynamic states allows for enhanced vascular assessment in a wide array of applications, such as the hospital, clinic, or mobile setting. See how innovative, accessible, ultrasound solutions can empower your vascular practice to provide the highest quality care now and in the future.

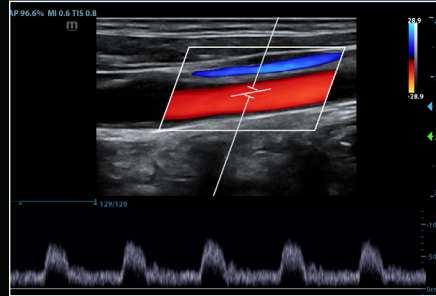

Your Expertise, Our Solutions

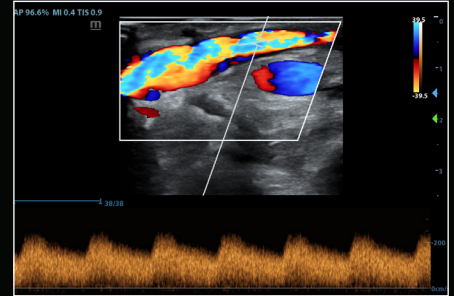

At Mindray, your mission is our foundation. You strive to provide patients with the best care possible and rely on outstanding medical devices to provide exceptional care with confidence. We were founded on the vision of increasing access to quality healthcare by providing accessible, relevant medical devices that exceed clinicians' expectations. Our ultrasound solutions provide crystal clear imaging, color sensitivity with little flash artifact, and easy-to-use advanced technology to ensure vascular clinicians have the information needed to provide confident answers and diagnoses.

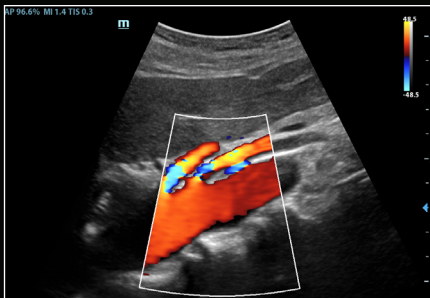

Power Doppler of the Interdigital Artery

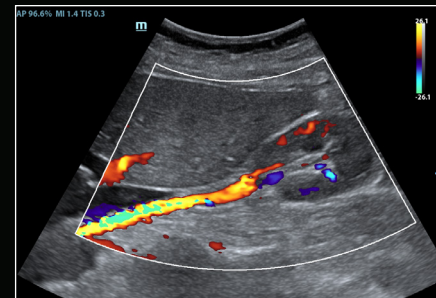

Color and Pulsed Wave Doppler of the Common Carotid Artery

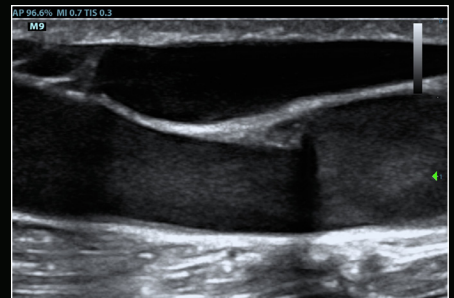

Color and Pulsed Wave Doppler of Upper Extremity Arteriovenous Fistula

Color Doppler of Aorta, Celiac Artery, and Superior Mesenteric Artery

Color Doppler of the Right Main Renal Artery

Lower Extremity Venous Superficial Varices using the L20-5 Linear Transducer
