MC-80 Automated Digital Cell Morphology Analyzer **Technical Specifications**

Analysis mode

WBC, RBC+PLT, PLT-Pro, Digital Slide Different combinations of analysis mode could be triggered according to the results of hematology analyzer.

Throughput

Peripheral blood: up to 60 Slides/hour (100WBC+RBC+PLT) * Values provided are approximate due to WBC concentration, number of non-WBCs and quality of the smear.

Oiling Method Automatic oil dripping

Slide Storage Capacity Up to 60 completed slides at the same time

Quality Control

Cell location accuracy test for the verification of the hardware and stain quality

Communication

Bi-directional LIS Ethernet 10/100/1000 Mbps

Supported Printers Laser/inkjet printers supported by Windows

System Components

labXpert software Computer with operating system of Windows 10 or above

Data Storage Capacity

Up to 80,000 samples Support data and cell images archiving of peripheral blood slides

Operating Environment

Ambient temperature: 15℃~32℃ Relative humidity: 30%~85% Atmospheric pressure: 70.0kPa ~ 106.0kPa (Altitude height: -400 m to +3000 m)

Power Supply

Voltage: 100 V-240 V (allowable deviation:±10%) Frequency: 50Hz/60Hz (allowable deviation: ±2Hz) Power: 300VA

Dimensions and Weight

Analyzer dimensions $Width \times Depth \times Height \le 600 mm \times 570 mm \times 700 mm$ Analyzer weight ≤100 kg

MC-80

Automated Digital Cell Morphology Analyzer

More Clarity. More Intelligence. More Productivity.

Diverse configurations to meet all kinds of demands

CAL 6000

MC-80 Automated Digital Cell Morphology Analyzer

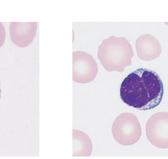

More Clarity

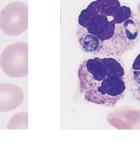

(Å) Display the ultra clarity and authenticity of each cell

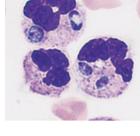

The high-performance objective lens and advanced image sensor offer ultra resolution images to reappear the real view under the microscope.

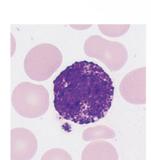

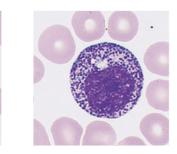

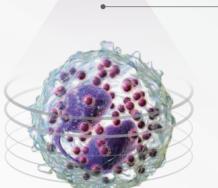

Capture all details with more than 20 depths of field

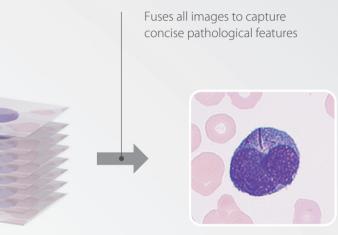

Multi-layer fusion technology

Simulates manual focus adjustment and accurately restores the pathological features of cells, which is helpful for early screening of blood diseases (such as acute promyelocytic leukemia) and infectious diseases.

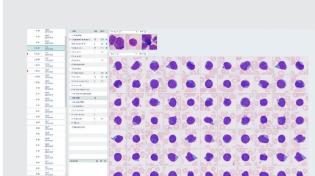

High-speed continuous capturing

(Capture comprehensive pathological features of each cell

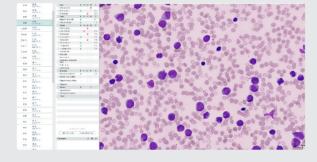

More Intelligence

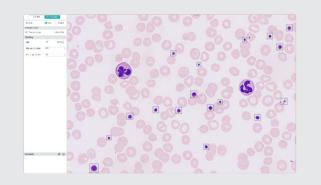

Reliable cell pre-classification and pre-characterization ((()))

Accurately pre-classifies white blood cells, especially abnormal cells, such as blast cells, reactive lymphocytes, etc.

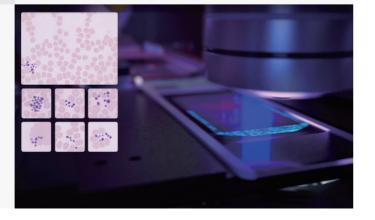

Pre-characterized RBC morphology can be modified with one click.

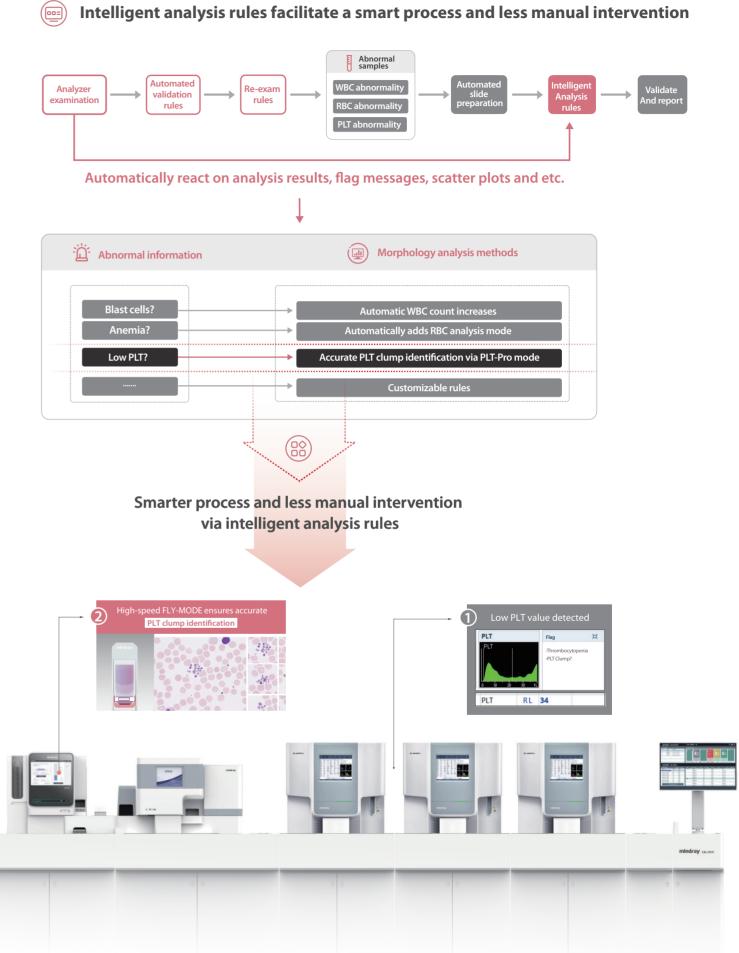

PLT counting assistance

More Productivity

.....

Remote review and consultation in multiple locations
