

## Greater insight at the bedside

Transform bedside assessments for faster, more informed clinical interventions with the Mindray VS9 Workstation, a future-proofed vital signs solution that drives high standards of care.

### Patient care beyond vital signs

From routine observations and EWS scoring, to falls assessment and pain scales, the VS9 helps reduce manual transcription and errors, enhancing nursing efficiency and patient safety.

- Input 30 manual parameters for comprehensive care
- 15-second BP readings for comfortable vitals
- Unique Orthostatic BP tool indicates fall risk
- Automatic NEWS2 calculation
- Optional Respiration Rate recorded from SpO2 sensor

## BeneVision™ Central Monitoring System

## Safer care with connected vitals

### Future-proofed system

Designed to flex to your clinical requirements now and in future, the VS9 features industry-leading workflow and customisation options in a robust, reliable package.

- Seamless Central Monitoring & EPR connectivity
- Send EWS Alarms to mobiles
- 10 customisable workflow profiles
- Validated with all leading UK cleaning agents
- Automatic NEWS2 calculation

The BeneVision Central Monitoring System allows complete digital surveillance across Mindray patient monitors, infusion pumps and vital signs. View all patient data at a glance, in real-time, for a streamlined clinical workflow that improves visibility throughout the patient journey.

## Confident care with EWS dashboard

The intuitive Early Warning Scoring dashboard provides caregivers with an immediately recognisable assessment of patient status, enabling earlier interventions and more confident responses to subtle signs of deterioration.

### EWS Trends View

Changes in a patient's status are highlighted to allow early detection of deterioration, giving you more time to intervene or make appropriate recommendations.

### Parameters & EWS View

- Provides a clear snapshot of patient vital signs and EWS
- EWS countdown reminds caregivers to do the next round spot check on time

## Safety through efficiency

Mindray's vital signs monitoring solution helps unlock the full potential of bedside assessments to improve patient outcomes. With flexible connectivity streamlining workflows, caregivers can efficiently gather quality data to improve patient safety.

### Comprehensive patient data center

- Caregivers can combine spot check and continuous data to create holistic data records for greater accuracy.
- Retrieve historical data from the CMS and review previous spot check or NEWS2, PEWS, MEOWS results on any VS9.
- Check patient's previous records without relying on local device storage - protecting patient data and keeping the device in use.

### Seamless and secure EPR connectivity

Integrate with your hospital EPR through standard IHE HL7 protocol for better system scalability. Automatic data collection simplifies the transcription process and SSL encryption provides secure data transmission.

### Accountable authentication

- Authenticate users with Mindray LDAP connected with hospital AD
- Integrate with Imprivata for secure user authentication
